## SUMMARY

Senior Frontend Engineer with 4+ years of experience building SaaS platforms, internal tools, and developer-focused products using React, TypeScript, and Next.js. Experienced in owning features end-to-end, from frontend architecture and API integrations to backend services and deployment workflows. Strong background in fast-moving startup environments with a focus on performance, maintainability, and product impact.

## EXPERIENCE

### Senior Frontend Engineer

*Synup Digital*

January 2024 – Present

*Bengaluru, India*

- Architected [MailDrift](#), an embeddable drag-and-drop email editor using React, TypeScript, and dnd-kit with reusable content blocks and customizable editing workflows.
- Built reusable UI infrastructure and scalable product workflows for Synup OS, a multi-tenant SaaS platform supporting agency partners and large-scale business operations globally.
- Published [synup-js](#), a zero-dependency TypeScript SDK for Synup's v4 API with full test coverage, improving developer experience for internal tooling and integrations.
- Worked across frontend architecture, API integrations, state management, testing, and developer tooling in a fast-moving product environment.

### Full Stack Engineer

*BugBase Security*

July 2022 – December 2023

*Bengaluru, India*

- Engineered core frontend and backend modules of [Pentest Copilot](#), an AI-powered autonomous pentesting platform that ranked #4 Product of the Day on Product Hunt.
- Designed REST APIs and MongoDB schemas for internal tools and partner integrations.
- Created and maintained an internal employee portal covering attendance tracking, leave management, authentication flows, and admin operations.
- Partnered with product and engineering teams to ship features quickly while keeping the codebase scalable and maintainable.

### Frontend Developer

*BookingJini Labs*

August 2021 – July 2022

*Bhubaneswar, India*

- Built reusable frontend components and dashboard workflows for a hospitality SaaS platform serving 3000+ hotel businesses.
- Contributed to frontend systems supporting booking, inventory, pricing, and reservation management workflows.
- Improved usability, responsiveness, and cross-device consistency across customer-facing hotel management dashboards.

## PROJECTS

[Spendich](#) | *Next.js, TypeScript, Mantine UI, Supabase, PostgreSQL, Telegram Bot API*

- Built a full-stack personal finance platform with LLM-powered natural language transaction parsing, recurring budgets, SMS/CSV imports, and categorized spending insights.
- Implemented real-time Telegram sync to log and track expenses directly through chat-based workflows.
- Developed responsive dashboards and reusable UI systems using Next.js App Router and Mantine UI, focused on usability and clean state management.
- Integrated Supabase authentication, PostgreSQL storage, and real-time updates to support a seamless multi-device experience.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, HTML5, CSS3

**Frontend:** React, Next.js, Redux Toolkit, Zustand, TanStack Query, Tailwind CSS, Material UI, Ant Design, Mantine UI

**Backend:** Node.js, Express.js, REST APIs, GraphQL, Supabase

**Databases:** MongoDB, PostgreSQL, DynamoDB

**Testing & Tooling:** Vitest, React Testing Library, Git, GitHub Actions

**Cloud & Deployment:** AWS (S3, Lambda, API Gateway), Vercel

**Concepts:** State Management, Unit Testing, Performance Optimization, Authentication, API Integrations, Reusable Component Architecture

## CERTIFICATIONS

---

**Meta Advanced React Professional Certificate**

*Coursea*

## EDUCATION

---

**Future Institute of Engineering and Management**

*Bachelor of Technology in Mechanical Engineering*

Kolkata, India

*August 2016 – July 2020*
